

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## TO THE READER.

In this work, Dr. Noah Webster's key to the Pronunciation of long, short and occasional sounds of vowels, diphthongs and consonants is adopted ; and the origin, meaning, application, and correct spelling and pronunciation of unusual words and names are given briefly in foot notes thus :—1 Am'per-sand. The name of the character &. 2 An'a-dem, Greek ἀνάδημα, A garland ; chaplet or wreath.

(3)

The Alliteration contains about five hundred lines, and more than two thousand words, and all words, except those of the foot notes, and some on the title page begin with the letter A.

## THE ARGUMENT.

---

It must be observed that the cardinal virtue of Temperance has hitherto chiefly appeared in a prose dress; sometimes quite plain, and sometimes very natty and picturesque, but seldom in the soft velvet, or glossy satin, or gorgeous brocade and delicate lace of real poetry, and never in the rich poetical costume of apt Alliteration's artful adaptation. The making of this unique garment for the sweet angel of Temperance, has been a very difficult but delightful task; and now, thus attired, she goes forth to strew her blessings all over the world. ✓

Observe further. The whole Alphabet is brought into a Temperance Convention, of which every letter is a member. They organize by electing Ampersand (&) chairman, and decorate him with a wreath or chaplet. He makes an alliterated address and the organization is completed by electing the letter Z assistant chairman, and the letter X secretary. Then the letter A is called to deliver an address, which he does, using no words whatever but those which begin with A.

Most respectfully submitted, "*pro bono publico*," by the

AUTHOR.
